

OWS  **FireRated**
Windows • Doors • Curtain Walling

Who we are

Here at OWS Fire Rated we have a burning passion – the safe and effective design, manufacture and installation of fire-resistant glazing products across the UK.

Your expert OWS team

Established in 1996, we have nearly 30 years of knowledge behind us, and our expert team are second-to-none in their ability to craft a bespoke solution, no matter how complex the requirement.

Team OWS are our biggest asset, and we all work hard to ensure that we are all leaders in our field.

Your first-class OWS product

Specialising in aluminium framed fire rated windows, doors, interior screens and curtain walling, we work with the world's premium suppliers to ensure that every OWS Fire Rated product is of the highest quality, and designed to always provide the most reliably safe solution.

OUTSTANDING

The OWS Fire Rated Promise

- **Committed to competency:** Your safety is in our hands, so we always go above and beyond what is required to deliver the very best
- **Proven performance:** We subject every element of our business to external testing, to help us ensure that we can confidently deliver safety as a priority
- **Driven by innovation:** We only work with market leading suppliers, allowing a variety of solutions to fit any requirement
- **A transparent process:** Every step of the process with OWS is as clear as our glass
- **Digital clarity:** Our robust digital record system allows simple management of data, for the lifecycle of your product
- **A safe environment for all:** We work closely with our industry peers, sharing knowledge and striving to improve our sector for everyone

PROJECT

Pennybank Chambers, London

The requirement:

Originally built in 1880 by the National Penny Bank Corporation Limited, Pennybank Chambers today houses modern office and retail space, and roof terrace on the top floor. The building's full-height, curved windows making the most of the great views across the capital.

The OWS Fire Rated specification:

Working alongside main contractor DDC Ltd and architects Emrys, OWS Fire Rated specified the Pyrostyle Insulated System for use on the project, to ensure safe escape routes were available from all six floors of the historic building, taking the building's high ceilings and clear design briefs of simplicity into consideration.

The result:

The architects had a strong vision in mind for the project, and the Pyrostyle solution allowed for their vision to become a reality. The interior screens and doors installed within the building offered a complementary aesthetic to their surroundings, whilst not compromising on safety.

The OWS Process

Design

Whether you are looking for a full curtain wall, single window or complex door system, specifying a fire rated glazing product is an incredibly specialist task. Our expert team, all highly trained in the delivery of these safety critical products, are always on hand to assist.

Manufacture

With safety at the forefront of what we do, we don't leave anything to chance. Our on-site fabrication facilities are digitalised for precision manufacturing, helping us guarantee the OWS Fire Rated quality time after time.

Install

Installing a fire rated product is not as simple as installing a standard glazed element, and OWS Fire Rated's expert national installation team are trusted by many of the biggest names in the construction industry.

Supply-only

We understand that many of our customers have an in-house installation team and may be looking for a supply-only service. We are happy to work with your own installation team to help provide the perfect solution.

PROJECT

White Lion Walk Shopping Centre, Guildford

The requirement:

A destination landmark in the town, the 1980's centre includes both retail and office space and was undergoing a significant overhaul to meet demands of modern shoppers and commercial needs.

The OWS Fire Rated specification:

Sealtite was engaged to install standard glazing systems, and OWS Fire Rated provided support with the specification, manufacture and installation of Aluprof MB 78 – EI fire rated screens for the internal commercial space, with Polflam EI 60 clear glass giving a crystal-clear view across the centre.

The result:

The final result was a showcase in safety working perfectly alongside aesthetics. The OWS Fire Rated screens ensure that the project is fully compliant with current regulations, providing both fire integrity and insulation.
